

IF NOT NOW, THEN WHEN?

Washington's students need substantive education reform now - not at some indefinite date in the future!

The Legislature has three options before it. The original House bill ESHB2261, which is a detailed road map to take us into the future. The original Senate bill ESB6048 which is a promise to think about taking us into the future.

Or it can decide to not decide - to do nothing.

Now is the time for Legislators to be courageous and ACT.

I support substantive education reform **NOW** and urge you to support the original House bill ESHB2261.
